Product of the week. Of course, if you want, you can download it. When I press download, it asks me to pick a pdf. I wonder how to make it download on my Mac. You may have to unzip it first. I don't know how to do it. I found a help page on how to do it here: [Ways to help Search for lizzywilsonvideos](#). This is a first beta release and we are adding a lot of features. We also have many ideas that we would like to implement but cannot because we don't have the time and resources necessary. This is still a work in progress, but we would love your feedback and ideas. So please, let us know how you like it and what you think we should add/change/get rid of. Feedback and suggestions are always welcome. Please also tell us if you find any bugs or issues that you've experienced during the beta period. We really appreciate your support.

latest technologies and products. We also boast an active community focused on purchasing decisions and technical aspects of the iPhone, iPod, iPad, and Mac platforms.

Q: Excel VBA if value in A=value in B add 1 to row 1 I'm trying to create a macro to search a range for a reference to the beginning of a month, and then add an offset of +1 to row 1. This is my code so far:

```
Sub MonthCount() ' declarations Dim wb As Workbook Dim Book1 As Workbook Dim LastMonth As Date ' pick the starting month LastMonth = DateSerial(2019, Month(Now), 1) ' make sure the file is open Set Book1 = ThisWorkbook ' make sure the file is open Set wb = Workbooks.Open(Filename:=Book1.FullName) ' check that all sheets are open If Sheets(3).AllSheets.Count = 0 Then MsgBox "All sheets must be f678ea9f9e"
```
